Cam

For the meeting on Friday can you please have copies of the spreadsheet of the final results. A blank example of the indicator form etc. Additionally can you have at least 5 finalised Indicator review forms that we can showcase to the Dr (most probably one from each category and one or two contentious ones ?). Friday is our first meeting with the Dr and I would like to be in a position to explain to him our system and processes, including our recording mechanisms and in particular explain to him (through examples) of how we worked through each individual case and how we came to the determination we did. This should give him an appreciation of the mechanics of the review and where we are coming from as well as some of the issues we faced (ie gay rape defence, other motives such as robbery, revenge paedophile killing, etc).

Friday will be relatively informal and is an opportunity for us to meet and greet the Dr and sound him out as to his intentions, how is is to conduct his academic review and also set up parameters around document/information flow, contacts etc.

Also - sometime on Friday can you please give me an update as to when you expect that you have completed the final drafts/editing of ALL the indicator forms.

Thanks mate

Craig Middleton | **Detective Chief Inspector**
Acting Commander | **Surry Hills Local Area Command**
