Operation Parrabell findings delivered to Parliamentary group including Jenny Leong; Bruce Nottley-Smith; Roy Bishop boo Alex Greenwich; Penny Sharpe and Jo

Contact with all 88 families to determine whether permission is granted to release details publicly

Details regarding missing paperwork

Recommendations regarding reinvestigation of matters where evidence existed and was found regarding potential bias or deficient initial investigation

Recommendations are important because we need to show how the NSWPF can improve as a result of this review. There needs to be an outcome and recommendations.

88 bias crimes only looked at - important to place into context that there was 1800 homicides - so. Not a representative sample - what will happen today if bias crimes are perpetrated - what are the processes for identifying bias crimes now and how could we be sure that we have moved forward today and that future bias crimes and homicides will be identified and dealt with and that we will not be back in this situation again moving forward.

Homicide Squad set up, media scrutiny, policies and practices of homicide investigation. What have we learnt and how have processes changed sand where to from now for bias crime identification - this is important - national standard for bias (gay hate, religion, language etc)

LECC involvement - whether their could be changes or improvements to reviewing policies and practices regarding bias crimes.

Transparency of practice now deficiencies and improvements that are now in place learning from the past.
