Craig

Thanks for doing that I am waiting for Phil Elliott (Crime Scene) to get back to me with a date so that we can have the forensic review. Can you tell from the photo which way the print is pointing on the tape dispenser as to which way it was probably been held. As the Victim was bashed over the head by the blade part of the tape dispenser.

I can wait for the forensic review just of interest.

Regards,

Stephen HUNGERFORD | Detective Senior Constable

SubjectDutfield murder

Stephen,
I have again compared Case N167016 - (Prints on Tape dispenser) against fingerprints of Arthur ASHWORTH. Graph W1 is identified as Right Ring Finger of ASHWORTH. I am unable to identify the remaining graph W2 as ASHWORTH. Was possibly incorrectly written off as Fully Eliminated in 1991. Graph W2 has now been scanned onto NAFIS with NO HIT.

Note - there is a notation on the rear of the photograph that D/Sgt D.O'Toole was informed of the identification by S/C David LOVIE, on 2/12/91.

regards
