ADDITIONAL REPORT
RE : Suspicious Death of Scott MILLER

I, Virginia FRIEDMAN,

hereby certify as follows:

(1) My scientific qualifications are Bachelor of Science of the University of Cape Town, South Africa.

(2) The following further item in connection with this matter was received from Geoff ALLEN, Forensic Courier, from the Sydney Police Centre on the twenty-first day of January, 1998.

5. T-shirt

(3) This item has been examined with the following results:

Human blood was detected on the T-shirt (item 5). DNA tests were carried out on the blood sample from Scott MILLER (item 1) and on 4 separate areas from the T-shirt.

The results are consistent with the blood in these 4 areas originating from Scott MILLER.

The DNA profile recovered from the blood occurs in approximately 1 person in 16 000 of the general population. The 95% confidence interval covers the range 1 in 12 000 to 1 in 21 000.

Additional DNA typing is available if considered necessary.

See the attached appendix for statistical and technical information.
