

## Contact with **I294** - declined to provide DNA sample

**File Number:** 47

**Product Type:** TEXT DOCUMENTS:Investigators Note

**Date of Note:** 24 Mar 2017

**Brief Description:** Further to the contact DSC CLANCY had with Virginia FRIEDMAN (FASS) from 10/03/2017, she finally managed to get in contact with **I294** (nephew of **NP210**).

As mentioned in the previous product, the degradable DNA sample from the underpants located at the crime scene has successfully been uploaded onto the National DNA database however there has been no match at this stage. The Y-filer for this DNA profile has obtained a partial result, making it a weak comparison. It may be possible to be compared to that of **I294** (nephew of **NP210**) DNA.

On 24/03/2017 DSC CLANCY managed to get in contact with **I294** via mobile phone (██████████).

DSC CLANCY provided **I294** with a summary of the following:

- \* it was deemed unreliable to obtain a DNA profile from a keepsake item belonging to **NP210** due to the length he has been deceased
- \* the DNA process was explained in further detail being police required **I294**'s DNA profile however only comparing the Y-filer not his entire DNA profile to this investigation

**I294** again declined to provide his DNA sample to police for this investigation. He did not have any further questions about this matter. DSC CLANCY thanked **I294** for his time for this matter.

It is not anticipated **I294** will be contacted again in relation to this investigation.

DSC CLANCY emailed Virginia FRIEDMAN (██) and advised her of the current status of this investigation.
