Dear Mark and Natasha,

Sorry about the delay in getting back to you. I have made a number of inquiries in relation to sharing our DNA profile with you to be compared against your unidentified body, who you believe may be our long term missing person Peter BAUMANN. (E: 909939200037 relates) who went missing on the 27 October 1983 aged 26 and would be 59 years old now.

We have a DNA comparison /sample profile from Auneliese BAUMANN, the mother of the MP, by way of three vials from barcode 62039637 that were entered onto our EFIMS under barcode X0000547398. We also have DNA Sequence on hand that was collected on the 21 August 2006.

When I contacted our subject matter experts they asked me the following:

Do you have a sample from the unidentified body  
Has this sample been uploaded to the National Database NCIDD

If you would like our sample, you will need to make a request for our profile by completing a Thatcher Form and emailing it to #FSGRMTCIDD so that you can complete the comparison. Alternatively you can forward your sample to us and we would do the comparison.

Kind Regards,

Kylie WHITING

Subject: LTMP - Karl Peter BAUMANN

(See attached file: Spreadsheet for unidentified human remains.xlsx)

Attn, Sgt Whiting.

Over the past several months I have been liaising with Samantha Davies from your end regarding LTMP Karl Peter BAUMANN (and other LTMP).

He went missing from the Eastern Suburbs NSW back in the early 1980's.

Page 2 of 2

When Samantha Davies initially provided me info she advised that there was DNA available to conduct comparative DNA tests regarding BAUMANN.

More recently our forensic services have been informed by your forensic services that they don't think DNA is available??

I was hoping that you could locate the original file or check your records and advise me one way or the other if in fact DNA does exist in regards to BAUMANN.

I have attached the original spreadsheet provided to me by Samantha that shows BAUMANN's details and that indicates DNA does exist.

Regards,
