## EFIMS

**EFIMS** is the acronym for the Exhibits Forensic Information and Miscellaneous Property System. EFIMS is the NSW Police Force corporate application for recording exhibits and miscellaneous property, and for requesting forensic scene attendance and analysis jobs. It tracks the 'lifecycle' of these items from collection through to disposal. If the item requires forensic analysis, a job is also created and tracked in EFIMS. Barcode scanners and labels are a critical component of this process.

**NOTE:** EFIMS cannot be opened in Chrome, it can only be run in Internet Explorer or EDGE with IE Compatibility turned on. For instructions on setting up IE Compatibility search Microsoft Edge - Internet Explorer Compatibility Mode in Blue Portal
