Brief Description

On Wednesday, 20/07/2005, during the review of the murder of Ernest Allan HEAD at Summer Hill, 17/06/1976, I came across a yellow envelope containing 3 further sealed smaller white envelopes. The writing on the yellow envelope indicated that it contained 4 items, however, only three were inside. The envelope was contained within an expanding file within one of the boxes. This file also contained the statements taken during the investigation.

The three white envelopes were each labelled FS76/178-29, 31 and 32 (it would appear that FS76/178-30 is the missing envelope). Each of the envelopes also stated they contained a cigarette butt and where it had been located. I did not open the envelopes, but it was apparent that they did contain cigarette butts as stated as there was tobacco crumbs throughout the larger yellow envelope.

On Thursday, 28/07/2005 I conveyed the exhibits to Ashfield Police Station and booked them up as exhibit 264/D194688 pending analysis at DAL.

In the brief was the original analyst certificate indicating that the items had been examined in 1976 and grouped, with the presence of group O, PGM 2-1 blood group substances established. This blood group is different to the deceased and consistent with semen found at the crime scene.
